Option 1 : Branded Venues

The Peak Festival at Perisher used images for each of their venues to promote the sponsor for that stage.

This appears in any venue listings, on the map, and as a larger view in the venue detail screen.

Option 2 : In-Venue Advertising

You can put your sponsor's logo and a link to their website inside of the venue descriptions.

You can combine this approach with the branded venues and add the venue logo directly into the venue image.

Option 3 : Call to Action Links

The Off-Grid Living Festival added side-menu links to their sponsors, worded as strong call-to-action statements, which perfectly matched the desires of their patrons to the products of their sponsors.

Option 4 : Sponsors Page

You can also just set up an HTML page with images, info, and links to your sponsors.
